TempTor Team Retrospective: 3L's

Liked:
- Group members are easy to get along with.
- Group works well together.
- Our group has a clear sense of direction as to where the project is headed.
- As a group, we come up with lots of great ideas and approaches to solve problems.
- We divided into two teams to do project so we completed more tasks quickly and didn't have tons of people all working on one side of project. (Agile rather than Waterfall.)
- A member of our group was previously familiar with Ruby and web setup, so he could teach us the basics.
- A homework assignment that utilizes Rails.
- We were able to get actual hardware to use.

Learned/Lacked:
- Experience working with Rails.
- Learned Ruby on Rails.
- Learned more about Raspberry Pi, as I've never used it before.
- Basic hardware and set-up of Raspberry Pi.
- Gained experience working with a Raspberry Pi.
- Experienced working with Google Charts.

Long For:
- More time to work on JavaScript portion of project.
- More than one semester to develop project.
- A clear meeting schedule and weekly agenda is needed.
- During our team meetings we should post onto Trello what we hope to complete that week.
